Asset Management - Technical

If you are non-technical it isn't necessary to read this page. iBase Media Services can handle all aspects of setting up your system, and will deal directly with I.T. Departments where required.

1. Database requirements

iBase Quartet supports MS SQL Server 2000 / 2005 / with support for SQL Server 2008 in the pipeline, and Oracle 10g.

2. Hardware requirements - suggested minimum specification

- Pentium 4 Xeon 3GHz or equivalent
- 2Gb RAM
- 20Gb spare RAID5 hard disk space (this does not include the space required for the image store)
- SVGA graphics card

3. Web server operating environment

- Windows Server 2003 or 2008 Standard Edition / Unix / Linux.
- Other components required will be supplied by iBase Media Services during installation.

4. Browsers

- IE 6, 7 & 8 / Firefox 2 & 3 / Safari 3 & 4. Note that Adobe Flash is not currently supported by Windows 64-bit browsers so some media content may be unavailable.
- Other browsers may be supported, call for details.
