iBase Manager - Technical

iBase Trinity is the upgrade path from iBase Manager. Please note that we no longer supply iBase Manager to new customers, although additional licences are available for existing systems.

Hardware requirements

In practice any new mid-range machine will run an iBase Manager satisfactorily, or the following minimum specification will provide the best possible performance.

- - Pentium 4 2GHz or equivalent
- - 1Gb RAM
- - 5Gb spare hard disk space
- - SVGA graphics card
- - Windows XP and Windows 7 (32 bit)
