## **Cataloguing - Technical**

*If you are non-technical it isn't necessary to read this page. iBase Media Services can handle all aspects of setting up your system, and will deal directly with I.T. Departments where required.*

### **1. Application**

iBase Manager is a 32 bit Windows client application for PCs, and also Macs running Windows virtualisation software, such as Microsoft Virtual PC or VMware.

### **2. Database requirements**

iBase Manager supports MS SQL Server 2000 / 2005 / with support for SQL Server 2008 in the pipeline, and Oracle 10g.

### **3. Hardware requirements**

In practice any new mid-range machine will run an iBase Manager satisfactorily, or the following minimum specification will provide the best possible performance.

- Pentium 4 2GHz or equivalent
- 1Gb RAM
- 5Gb spare hard disk space
- SVGA graphics card
- Windows XP and Windows 7 (32 bit)
