Training Services

A comprehensive range of training services, at your own location and customised to requirements, are available for all iBase products. For overseas customers - and if more convenient wherever you are - training can also be provided remotely via online access.

Online training is especially useful for administrators' refresher sessions, and for helping new staff to be up and running quickly and easily.

Learning and understanding

iBase training isn't just about how to use our products, with our wealth of experience we can also provide help and guidance on managing digital assets for many purposes, including brand asset management, federated searching, digital asset management processes and techniques etc..., in other words how to make the most of your media management software system be it for internal use, a web based system, or simple photo library software.
